

# PROGRAM of 1<sup>st</sup> Int:FunMAX 2020 online-workshop, August 10-12, 2020

(Titles of presentations on following pages and ZOOM link)

## TIMEZONES

MST	EST	CET	KRAT	Monday	Tuesday	Wednesday	
23:00	2:00	8:00	13:00	Opening /ZOOM Test	Opening / ZOOM Test	Opening / ZOOM Test	
23:15	2:15	8:15	13:15	Wiedwald, Ulf	Birkel, Christina	Pazniak, Hanna	
23:30	2:30	8:30	13:30				
23:45	2:45	8:45	13:45				
0:00	3:00	9:00	14:00	Break	Break	Break	
0:15	3:15	9:15	14:15	Bürgler, Daniel	Baron, Philipp	Dahlquist, Martin	
0:30	3:30	9:30	14:30		Lyons, Jack		
0:45	3:45	9:45	14:45		Break		
1:00	4:00	10:00	15:00	Ovchinnikov, Sergey	Feggeler, Thomas	Break	
1:15	4:15	10:15	15:15			Zhang, Hongbin	
1:30	4:30	10:30	15:30				
1:45	4:45	10:45	15:45	Break	Break	Molokeev, Maxim	
2:00	5:00	11:00	16:00		Lyashchenko, Sergey		
2:15	5:15	11:15	16:15	Stevens, Marc			
2:30	5:30	11:30	16:30	Sobolev, Kirill			
2:45	5:45	11:45	16:45	Nazarova, Zoya	Maximova, Olga	T3 Farle, Michael: Scientific Writing and Publishing and Presenting	
3:00	6:00	12:00	17:00	Break	Break		
3:15	6:15	12:15	17:15	Tutorial 1: Semisalova, Anna	Tarasov, Anton		
3:30	6:30	12:30	17:30				
3:45	6:45	12:45	17:45				
4:00	7:00	13:00	18:00	Tutorial 2: Bürgler, Daniel	Break	Final Remarks	
4:15	7:15	13:15	18:15		Tarasov, Ivan	T3 Farle, Michael: Scientific Writing and Publishing and Presenting	
4:30	7:30	13:30	18:30				
4:45	7:45	13:45	18:45				
5:00	8:00	14:00	19:00	Small Group discussions ("Breakout") session	Lukyanenko, Anna		
5:15	8:15	14:15	19:15		Tarasov, Ivan		
5:30	8:30	14:30	19:30		Break		
5:45	8:45	14:45	19:45	Barsoum, Michel	Shuck, Christopher		
6:00	9:00	15:00	20:00				
6:15	9:15	15:15	20:15				
6:30	9:30	15:30	20:30				
6:45	9:45	15:45	20:45				
7:00	10:00	16:00	21:00	End of Day's program	End of Day's program		

KRAT = [https://www.zeitzonen.de/krasnojarsker\\_zeit.html](https://www.zeitzonen.de/krasnojarsker_zeit.html) (Krasnoyarsk Time)

CET = <https://www.zeitzonen.de/tztimezones/detail/id/17> (Central European Timezone)

EST = [https://www.zeitzonen.de/eastern\\_standard\\_time\\_est\\_-\\_usa.html](https://www.zeitzonen.de/eastern_standard_time_est_-_usa.html)

MST = [https://24timezones.com/usa\\_time/az\\_maricopa/tempe.php#gref](https://24timezones.com/usa_time/az_maricopa/tempe.php#gref) (Mountain Standard Time)

### Tutorial talks

Daniel E. Bürgler	Peter Grunberg Institute (PGI-6), Germany	<i>Spin-Polarized Scanning Tunneling Microscopy and Spectroscopy of Single Hybrid Molecular Magnets</i>
Michael Farle	University of Duisburg-Essen, Germany	<i>Scientific Writing and Publishing and Presenting</i>
Anna Semisalova	University of Duisburg-Essen, Germany	<i>Ferromagnetic Resonance: Theory and Applications for thin magnetic films</i>

### Invited talks

Michel W. Barsoum	Drexel University, USA	<i>On Ripples and MAX Deformation</i>
Christina S. Birkel	Arizona State University, USA Technical University of Darmstadt, Germany	<i>Creative synthesis techniques to access "old and new" MAX phases</i>
Daniel E. Bürgler	Peter Grunberg Institute (PGI-6), Germany	<i>Anisotropic conductivity in thin films of MAX phase (<math>Mn_{0.5}Cr_{0.5}</math>)<sub>2</sub>GaC and crystallites of i-MAX phase (<math>Cr_{2/3}Ho_{1/3}</math>)<sub>2</sub>AIC</i>
Martin Dahlquist	Linköping University, Sweden	<i>Prediction of order and disorder in MAX phases</i>
Thomas Feggeler	University of Duisburg-Essen, Germany	<i>Element-specific and spatially-resolved detection of the magnetization and its dynamics by X-ray Magnetic Circular Dichroism (XMCD)</i>
Sergey Lyashchenko	Kirensky Institute of Physics, Russia	<i>Magneto-ellipsometry investigations of epitaxial film of Mn<sub>2</sub>GaC at different temperatures.</i>
Maxim Molokeev	Kirensky Institute of Physics, Russia	<i>A variety of ways to determine doping concentration by X-ray diffraction</i>
Sergey Ovchinnikov	Kirensky Institute of Physics, Russia	<i>Temperature and concentration dependence of the magnetic short range order and electronic pseudogap in 2D Hubbard model</i>
Hanna Pazniak	University of Poitiers, France	<i>Ion Implantation: A New Approach for Structural Modification of Two-Dimension MXenes</i>

Anton Tarasov	Kirensky Institute of Physics, Russia	<i>MMM laboratory equipment, techniques and methods</i>
Ivan Tarasov	Kirensky Institute of Physics, Russia	<i>Growth of <math>\alpha\text{-FeSi}_2</math> nanocrystals on silicon surface: the impact of gold and the Si/Fe flux ratio, the origin and the prediction of <math>\alpha\text{/Si}</math> orientation relationships and interface structures</i>
Christopher E. Shuck	Drexel University, USA	<i>MAX Phases as Precursors to New MXenes</i>
Ulf Wiedwald	University of Duisburg-Essen, Germany	<i>MAX Phase Nanolaminates: Structure, Transport and Magnetism</i>
Hongbin Zhang	Technical University Darmstadt, Germany	<i>High-throughput design of magnetic MAX and MAB phases</i>

## Contributed talks

Filipp Baron	Kirensky Institute of Physics, Russia	<i>Effect of the forming gas ALD chamber pretreatment on the physical properties of <math>\text{TiN}_{(1-x)}/\text{O}_{(x)}</math> films</i>
Anna Lukyanenko	Kirensky Institute of Physics, Russia	<i>Methods of forming sub- and nanoscale patterns on magnetic thin films</i>
Jack Lyons	Imperial college London, United Kingdom	<i>Role of intermediate intermetallics in the formation of MAX phases</i>
Olga Maximova	Kirensky Institute of Physics, Russia	<i>How to obtain the dielectric tensor from spectral magneto-optical ellipsometry measurements data</i>
Zoya Nazarova	Kirensky Institute of Physics, Russia	<i>Prediction of formation of competing phases during the growth of <math>(\text{Mn}_{1-x}\text{Cr}_x)_2\text{GaC}</math> thin films on <math>\text{MgO}(111)</math> with the use of effective heat of formation model and near coincidence site lattice approaches</i>
Kirill Sobolev	Immanuel Kant Baltic Federal University, Russia	<i>Synthesis and characterization of <math>(\text{Cr}_{1-x}\text{Mn}_x)_2\text{AlC}</math> MAX-phases with the enhanced manganese doping level</i>
Marc Stevens	University of Duisburg-Essen, Germany	<i>Epitaxial growth of <math>\text{Cr}_2\text{AlC}</math> MAX phase thin films by pulsed laser deposition</i>
Ivan Tarasov	Kirensky Institute of Physics, Russia	<i>Modification of optical and magneto-optical response of highly textured <math>\text{Au}_3\text{Fe}_{1-x}/\text{Fe}</math> Janus-like nanocrystals grown on amorphous silicon dioxide surface</i>
